KEYMACRO is a fast and easy-to-use application that lets you record keyboard keys and mouse activities. It allows you to record all keyboard presses and mouse movements, and then replay them later. This can be used to record and later edit all the changes you make to the system. It's also useful for making tutorial videos. With Keymacro, you don't have to feel embarrassed or scared when you're a little behind or if you want to make your work look more professional. Keymacro is a "second keyboard" for Windows. Let's say you want to change a word in a document or find a certain file. You can simply press a combination of keyboard keys to find the result. It's a bit like having your own personal helpmate. Keymacro includes a comprehensive set of features. It can record and play back several different types of input: a hotkey, a hotkey pressed repeatedly, a menu selection, an image selection, a window, the mouse cursor, the mouse pointer, the cursor inside a window, the window titles, the window contents, the icons, the menus, and many more. If you're making a video, you can record and save a custom keyboard command to jump to a certain point or pause the video. Keymacro is integrated with Windows and is always with you. It's easy to get started: simply press a key combination, or click on a mouse button, and record the activity. There are also some options that you can adjust to make the app work better for you, such as key repetition or mouse movement speed. Keymacro also allows you to save your recordings as an audio file. As you can record various types of data, you can do all of this without the need for expensive software. Keymacro can be installed on Windows 8 and above. What's new in version 10? - Changed keys from: Win key + R for recording, Win key + Space for recording - Added recording hotkey (Win + R).
