Cracking Adobe Photoshop is a bit more involved, but it can be done. First, you'll need to download a program called a keygen. This is a program that will generate a valid serial number for you, so that you can activate the full version of the software without having to pay for it. After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

But, as you edit documents, you have the choice to defer any edits to your desktop so you don't lose any changes to the document. This is the case only for those users that have enabled the desktop sync. Once you are finished, when you have saved changes to the document, you can make the edits in the desktop version of Photoshop, or you can discard the edits made in the iPad app, and make final edits on the desktop version. You can also accomplish this by again enabling the desktop sync and selecting the desktop browser window. The desktop will appear to be completely locked in an editing state, and if you ever try to open it, the popover will ask you if you would like to discard the edits made in the iOS app. Then there is the **Add Learning Preset** a useful way to save time. It lets you search for a preset, and then add it to a new document or folder if you already know the name. If you're not good at remembering the names of presets, you can use the **Get More Presets** feature to load presets from other folders or files. You can import all of your presets into Photoshop if you already have them saved. Like all Photoshop assets, edits that are made via AI aren't necessarily perfect. Certain odd formats, such as the years listed below the date stamp on some AI changes, be it added or moved, offer more questions than answers. In addition to the animations and the form of AI changes, we also found that some AI edits don't quite match the rest of the result, at times showing a mismatch in the overall composition or overall aesthetic.
